I colori e le tonalità devono intendersi solo come indicativi. L'Azienda si riserva di apportare tutte quelle modifiche che riterrà necessarie per il miglioramento tecnico-funzionale dei manufatti.

I manufatti vengono impregnati con prodotti idrosolubili che proteggono il legno da muffe, raggi UV e conferiscono una maggiore resistenza. La vernice di finitura, sempre idrosolubile, è inodore e non contiene solventi, per un maggiore rispetto per l'ambiente e la salute.
